

THE SMART CHOICE

Functionality to fit your compact, well-designed office

KYOCERA's new Smart Series A4 and A3 multifunctional printers are designed with compact, well-designed offices in mind. Their 360° all-round style looks good from any direction, even in the middle of the office! These machines can even be fine tuned to suit your unique work requirements, due to their compact

design: additional paper cassettes with one or two paper feeders; network faxing; gigabit Ethernet card; thin print activation; and an up to 500 sheet staple finisher. These new ECOSYS A4 and A3 MFPs provide big support in any small office.

COMPACT ECOSYS MFP FOR A4/A3 FORMAT

The Kyocera Smart Series includes:

PRESCRIBE
With the KYOCERA page design and control language PRESCRIBE, even complex graphics, logos and forms (multipart forms) can be created independently on the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

The KM NetViewer
The KM NetViewer enables complete monitoring and control of all ECOSYS printers and digital KYOCERA multifunction units from any Windows® PC and thus provides ideal network administration. It also supports the standardised SNMP protocol.

Status Monitor and Command Centre
The Status Monitor shows the current printers condition and gives direct access to the Command Center for the modification of settings that are not contained in the drivers (e.g. network settings, adjustment of sleep mode or blocking of the control panel).

USB Host Interface for USB Flash Memory
PDF files can be printed directly from a USB Flash Memory (e.g. USB stick) via the USB host interface. Documents are selected directly via the printer's control panel. No computer is required.

ECOSYS Our Unique Printing Technology
ECOSYS stands for ECOlogy, ECOmy and SYStem-printing. With long-life components, ECOSYS devices are designed to maximise durability and minimise the total cost of ownership with regard to maintenance, administration and consumables. The cartridge-free system means that only the toner has to be replaced regularly, and the drum units every 300,000 pages. The modular design concept allows you to add workflow-enhancing functions as required. Integrated system software provides long-term cross-network compatibility. KYOCERA's long-life components cost you and the environment less.

Kyocera ECOSYS A3 MFP – THE SMART CHOICE

Designed to meet the business requirements of small offices

Just because your office is small does not mean you have to compromise on your professional printing requirements. You still need high-quality output and if anything, you need even greater efficiency and productivity. Specifically designed to handle the volume demands of networks and workgroups with between 10 and 20 users, the new KYOCERA Smart Series offers a paper capacity of up to 1,600 pages from four sources, plus the ability to process paper weights of up to 256 gsm. The innovative colour touch panel can be customised to each user making it easy to access all the functions you really need.

Additionally, the new Smart Series multifunctional printers offer all the benefits of professional level document management, including A3 format printing and copying at up to 30 pages per minute, at a price that fits the most challenging budget. With the flexibility of standard features such as faxing and colour scanning directly to your PC, a network folder or a USB flash memory stick, as well as the reduced paper usage of standard duplex printing, these new KYOCERA MFPs easily satisfy the needs of the most compact offices.

Product highlights to meet your requirements:

- Choice of colour or monochrome printing devices
- Up to 30 A4 pages per minute
- Time to first copy: 9.2 seconds or less
- Professional print, copy, scan and fax functionality
- Colour scan functionality
- Up to 1,600 sheet paper capacity
- Minimum installation and operational requirements
- Easy to use Colour Touch Panel with wizard-style navigation
- Compact 360° all-round style design and low noise emissions
- Long-life components that are efficient and reliable
- Exceptionally low total cost of ownership in its class

The Smart MFP for a small office with a smaller budget

KYOCERA's ECOSYS technology is where economy and ecology meet. The unique ECOSYS technology cuts the cost of consumables and energy use, as well as providing exceptionally low printing and whole-of-life costs. Long-life technology with longer maintenance cycles help ensure unprecedented reliability. The Smart Series has been designed to minimise ozone emissions and reduce noise levels, whilst promoting a more comfortable office environment. Make the most of your office environment and your budget with KYOCERA.

Efficiency, flexibility and increased productivity

With a generous paper capacity and impressive performances in copy speed, the Smart Series MFPs handles most office printing requirements, improving efficiency and productivity. The powerful controller and durable, high-speed document processor enables all your copies, scans and faxes to be sent across either local or wide area networks, whilst the job separator allows you to keep the output of different users apart. Combining the most sophisticated functionality, Smart Series MFPs are incredibly easy-to-use and cost-effective – fewer misdirected documents saves time and paper. Just fast warm up, quiet operation and professional document management in a stylish, compact design.

Clever functionality with user-friendly instructions

So you need to print, fax and copy data in A4 and A3? No problem. Like to scan and share documents in colour even if printing jobs are mainly done in black and white? At no extra cost? Also no problem. No more lost time on complex operations. No more frustrations trying to work out the best way to present your information. Simply scan your documents and send them directly to an individual PC, store

them on a network server, or even attach to specific e-mail. Streamline your archiving by ensuring documents are stored and easily retrievable from where they belong. Use sophisticated document management functions such as logins, codes, user defined functions, colour print volume controls and access.

Professional quality full-colour printing

Together with A3 printing, KYOCERA Smart Series multifunctional printers offer full, professional print quality and functionality. The improved toner technology and superior hardware of the FS-C8020MFP and FS-C8025MFP deliver vibrant, high resolution colour printing, ensuring pin-sharp lines and clear images.

The new KYOCERA MFPs are the smart choice for eco-friendly offices – when the toner does finally run out, it is only the toner container that needs to be replaced, instead of an entire cartridge including drum and/or developer.

Keeps your information, documents and data secure

As data security becomes a high priority, the Smart Series multifunctional printers offer the latest security standards required in modern corporate network environments. The printers are easily integrated into your company's IT infrastructure and come with an IPsec and the SSL suite of encryption protocols, ensuring data travelling through your network is secured.

The Active Directory network authentication enhances security without the need to set ID access data for each single user. Simply use the preset network authentication data for managing access rights to the machine's functionalities.
